## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

The Patent Term Adjustment to date is 0 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 0 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-8, 11- 13 are allowed.

The following is an examiner's statement of reasons for allowance:

Holloway et al. (hereinafter "Holloway") (USPN. 6,183,131) discloses a temperature sensor corrects the parabolic curvature error in the output signal without attempting to linearize the reference voltage itself. A temperature sensor produces a temperature output signal that is a function of the ratio of a temperature dependent voltage to a reference voltage. The temperature sensor uses a nonlinear reference voltage, e.g., the reference voltage conforms to a curve with an approximately hyperbolic shape over a temperature range, so that the ratio of the temperature dependent voltage to the hyperbolic reference voltage will be linear. The hyperbolic reference voltage is generated by summing a reference voltage with an appropriate temperature dependent voltage. The "gain" or slope of the ratio is altered by adjusting a scaling factor. Finally, the offset of the ratio is adjusted so that the temperature sensor produces the appropriate output signal at ambient temperature. Thus, despite the present of curvature in the reference voltage of the temperature sensor, a highly linear and accurate temperature sensor may be constructed using the hyperbolic linearization technique without requiring complex or expensive reference voltage correction circuits [see Holloway: Abstract; col. 1, lines 15-50; col. 7, lines 7-67 and col. 11, line 14-col. 12, line 6].

Regarding claim 1, the closest prior art (Holloway) either singularly or in

combination fails to anticipate or render obvious the combination wherein "a temperature extraction unit receiving the first signal and the second signal for calculating a first temperature point based on the first signal and for calculating a second temperature point based on the second signal, wherein the second temperature point is a virtual temperature point and wherein the first and second temperature points are different from each other, *wherein the second temperature point does not exist in the semiconductor chip during calibration of the temperature setting curve*" in combination with other limitations in the claims as defined by Applicant.

Claims 2, 3, 8, 11 and 12 depend from allowed claim 1 and therefore are also allowed.

Regarding claim 4, the closest prior art (Holloway) either singularly or in combination fails to anticipate or render obvious the combination wherein "extracting a first actual temperature from the first signal and a second virtual temperature from the second signal, *wherein the first actual temperature and the second virtual temperature are different from each other and wherein the second virtual temperature does not exist on the semiconductor chip during calibration of the temperature setting curve*" in combination with other limitations in the claims as defined by Applicant.

Claims 5-7 and 13 depend from allowed claim 4 and therefore are also allowed.

### **Conclusion**

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments

on Statement of Reasons for Allowance.”
